

Medium Duty Mobile Racking System

Medium Duty Mobile Racking

This dynamic type of racking is the total logistical solution for saving space and increasing storage capacity. It helps to reduce not only the cost of acquiring new one but also operating cost in maintaining warehouses.

KARA Medium Duty Mobile Racking removes the unusable space volume of aisles in conventional racking system. Each mobile racking unit remains compacted until they are required to be accessed and moves along floor rails to create an aisle in between two racking unit by rotating the handle fixed on the side of each mobile unit. Application of this type of racking system saves up to 50% in the space available, which means capacity is maximized around two times in the same space.

System specifications of Kara Medium Duty Mobile Racking is tailored made according to the available space of the end-user and according to the material for storage. Three type of system: (1) Manual System, (2) Electrical System & (3) Electronic System.

Application of Mobile Racking System :

- Industrial warehouses
- Loose materials or small pallets
- High volume throughput of light cartons, etc.

Features of Mobile Racking System:

- Simple storage system for small warehouse
- Less space for aisle (100% savings in space)
- Increase utilization for pallet position
- Increase the capacity without any cost to build or rent a new warehouse
- Full control of goods
